

1. Power up the CLOQ by connecting the magnetic USB to the base connector point.

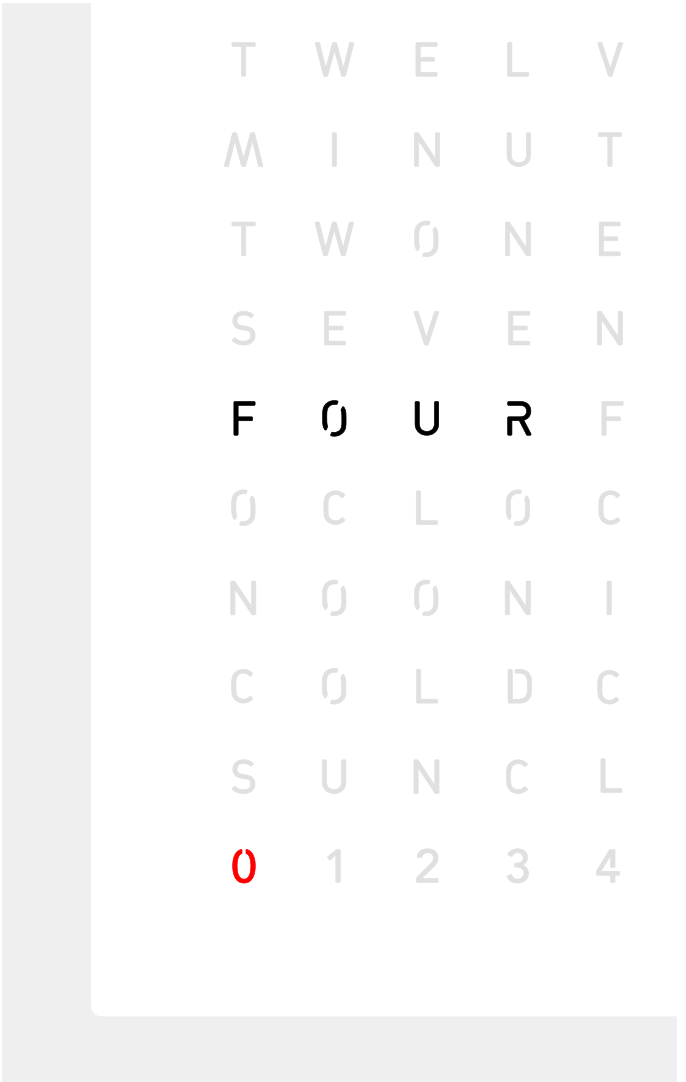

2 Open your WiFi Network settings on your phone and connect to ‘MyCLOQ’.

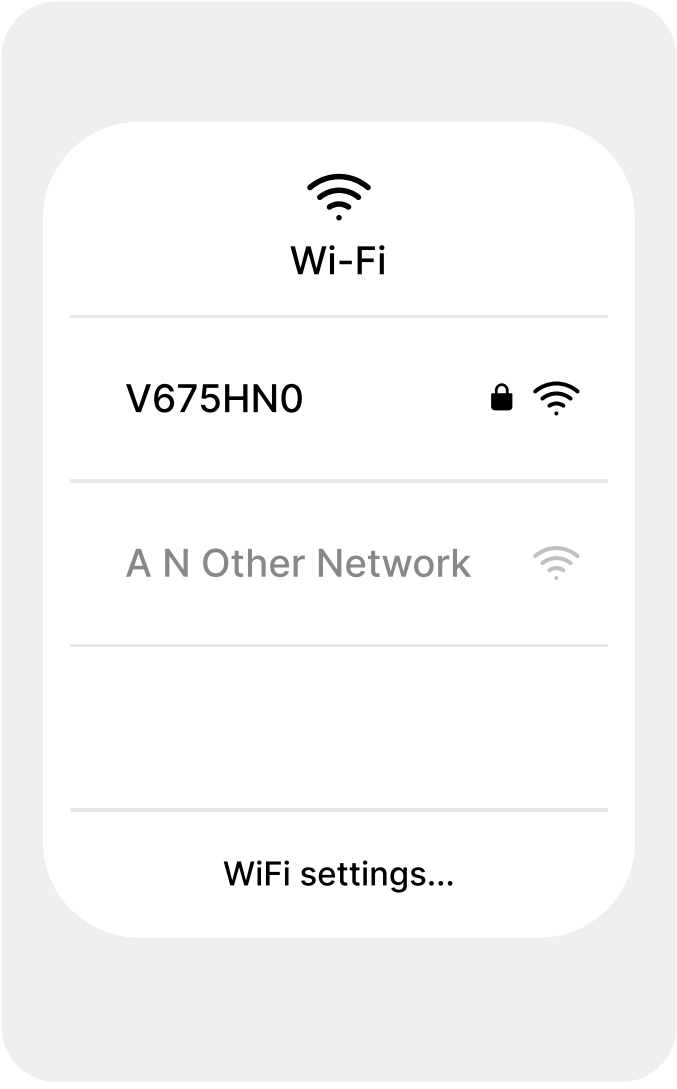

3 Open up a Browser on your phone and type 192.168.4.1 into the address bar, and press enter.

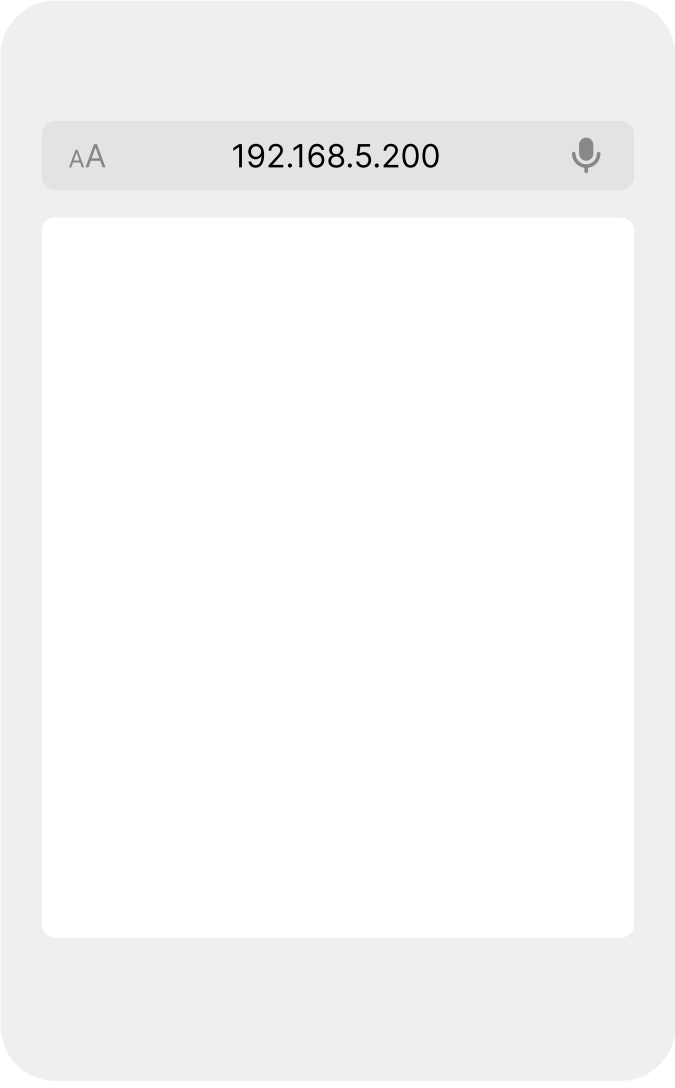

4 You will be presented with a list of Network options. Select your usual WiFi Network, enter the associated password and press “Let’s Go’.

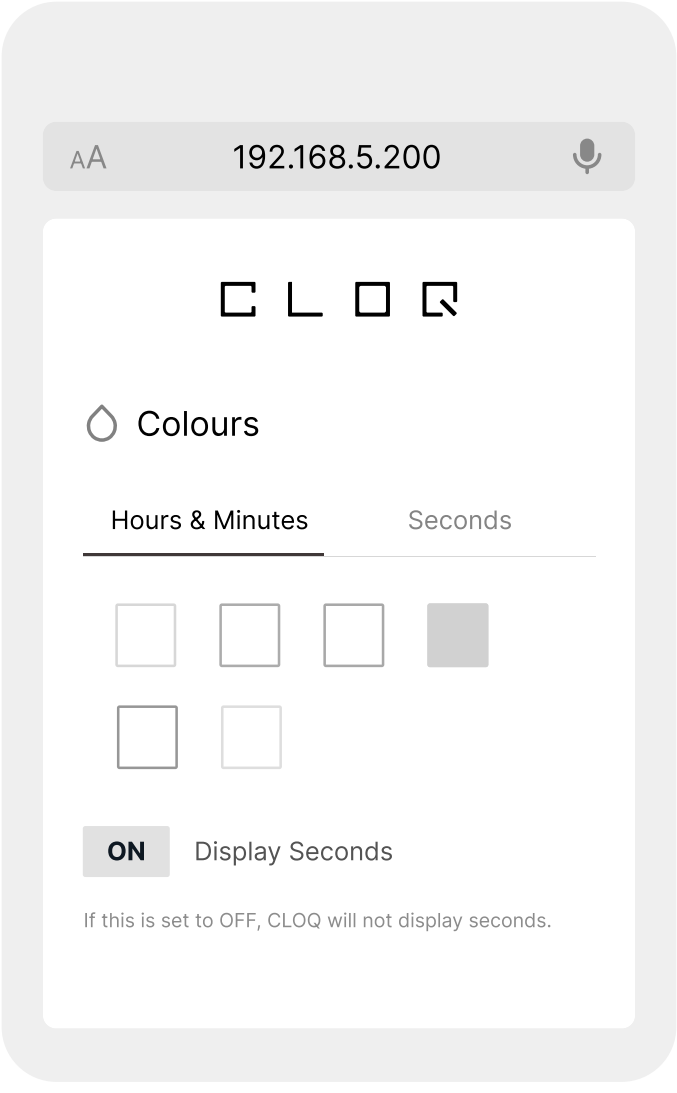

5 The ‘0’ LED will flash until it connects to your WiFi Network. CLOQ will spell out a series of numbers (192.168. number.number). This will be the local IP Address you will use to access the CLOQ App on your phone or tablet so make a note of it.

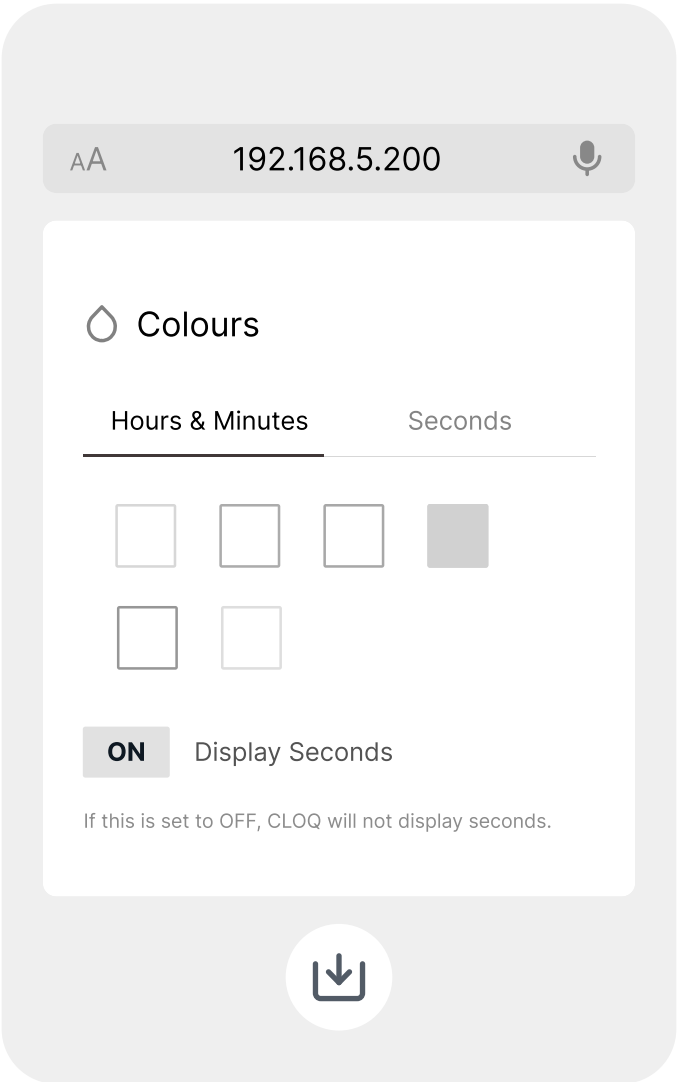

6 Re-instate your normal WiFi Network on your phone.

7 Open up the Browser on your phone and type in the IP Address that you wrote down (Eg: 192.168.5.200)

8 Now you should see the CLOQ App screen appear. This will allow you to change some of the settings.

**9** Add this to your Home Screen to keep it easily accessible.
